Summary

I am a Computer Science graduate with a strong academic standing (GPA 3.940) at FCCU and experience through software engineering, quality assurance, UI/UX design, website frontend development and data analysis projects. Skilled in translating user and client requirements into structured software designs and intuitive interfaces. Particularly interested in software quality assurance, user-centered design, software requirements management, software prototype designing and conceptualization, web app frontend development, graphic designing and UI/UX designing. Always seeking to work on building complex software and coming up with interesting software ideas, devoted to working on AI and Machine Learning related research. Actively seeking remote or entry-level opportunities to grow within the industry.

Core Competencies/Main Focus

- | | | | |
|---|--------------------------------|------------------------------|----------------------------------|
| • Aspiring Software Quality Assurance Manager | • Full Stack Web App Developer | • Graphic Designer | • Data Science/ Machine Learning |
| • UI/UX Designer | • Software Prototype Design | • Digital Illustrator/Artist | • Research/ Machine Learning |

Education

BS Computer Science (BCS)

Forman Christian College (A Chartered university), Lahore.

Intermediate

2022

Forman Christian College (A Chartered university), Lahore.

Projects (Detailed in Portfolio)

- Educational Institute Management related Software Requirements Document (SRS)
- Final Year Project related to aiding BISE affiliated educational institutes in developing timetables/schedule efficiently
- A Python based Space Shooting game using Pygame
- Research analyzing Students Environmental Factors in relation to their Academic Performance and comparing using relevant AI models based on the dataset.
- Code of inner workings of a Compiler (Preprocessor, Assembler) using C Language

Awards & Achievements

- 3.940 GPA
- Received Gift Scholarship from FCCU
- A Grade in renowned difficult Computer Science Courses (Data Structures and Algorithms, Operating Systems, Compiler Construction, Intro to AI, Machine Learning)

Skills & Interests

Coding Languages: Python, C, JavaScript(React, Node for Web App Dev)

Design Tools: Canva, PicsArt, IbisPaint, ProCreate

Scheduling Tools: Jira, Microsoft Excel

Personal Interests and Hobbies: Digital Art, Character Concept Design, Web Interface Design, Gaming
